"IMPORTANT SAFETY INSTRUCTIONS"

"When using an electrical appliance, basic safety precautions should always be followed, including the following."
"Read all instructions before using this sewing machine."

"DANGER - To reduce the risk of electric shock: "

- "This sewing machine should never be left unattended when plugged in. Always unplug this sewing machine from the electric outlet immediately after using and before cleaning."
- "Always unplug before replacing light bulb. Replace bulb with same type rated 15 watts."

"WARNING - To reduce the risk of burns, fire, electric shock, or injury to persons: "

- 1. "Do not allow to be used as a toy. Close attention is necessary when this sewing machine is used by or near children."
- 2. "Use this sewing machine only for its intended use as described in this manual. Use only attachments recommended by the manufacturer as contained in this manual."
- 3. "Never operate this sewing machine if it has a damaged cord or plug, if it is not working properly, if it has been dropped or damaged, or dropped into water. Return the sewing machine to the nearest authorized dealer or service centre for examination, repair, electrical or mechanical adjustment."
- 4. "Never operate the sewing machine with any air openings blocked. Keep ventilation openings of the sewing machine and foot control free from the accumulation of lint, dust, and loose cloth."
- 5. "Never drop or insert any object into any opening."
- 6 "Do not use outdoors."
- 7. "Do not operate where aerosol (spray) products are being used or where oxygen is being administered."
- 8 "To disconnect, turn switch to the off ("0") position, then remove plug from outlet."
- Do not unplug by pulling on cord. To unplug, grasp the plug, not the cord.
- 10. "Keep fingers away from all moving parts. Special care is required around the sewing machine needle."
- *Never sew with a damaged needle plate as this can cause needle to break."
- 12. "Do not use bent needles."

- 13. "Do not pull or push fabric while stitching. It may deflect the needle causing it to break."
- 14. *Switch the sewing machine off (*0") when making any adjustments in the needle area, such as threading needle, changing needle, threading bobbin, or changing presser foot, etc.*
- 15. "Always unplug sewing machine from the electrical outlet when removing covers, lubricating, or when making any other user servicing adjustments mentioned in the instruction manual."

"CAUTION - Moving parts - To reduce risk of injury, switch off before servicing. Close cover before operating machine."

"SAVE THESE INSTRUCTIONS"

"This product is for household use, or equivalent."

FOOT CONTROL (USA ONLY)

ELECTRONIC MODEL

Use Matsushita Electric, Model 4C-316B with this sewing machine.

POLARIZED PLUGS CAUTION

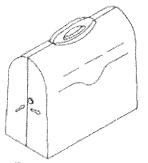

This appliance has a polarized plug (one blade wider than the other). To reduce the risk of electric shock, this plug is intended to fit in a polarized outlet only one way. If the plug dose not fit fully in the outlet, reverse the plug. If it still dose not fit, contact a qualified electrician to install the proper outlet. Do not modify the

Removing Front Cover

Quilt 'N Sew Machine

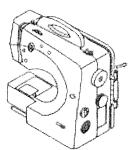

The machine's hard cover is designed for multiple functions. It is a portable case that has storage for your sewing notions and it can also be used as an extension table for more sewing surface.

TO OPEN THE COVER:

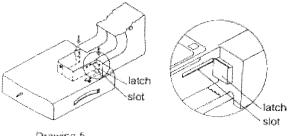

- 1. Press the button on the left side of the cover. (Drawing 1)
- 2. Swing the front cover to the right. You will see a hinge at the right rear side of machine.
- Press down on the upper pin located at the hinge and push into the side stot. Push up on the lower pin and push into the side stot. Remove the cover from the machine. (Drawing 2)

Drawing 3

Drawing 4

Drawing 5

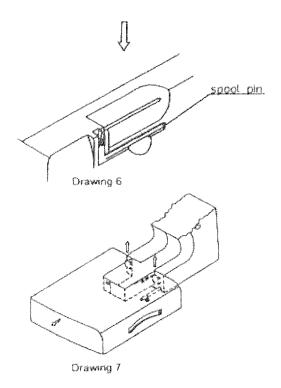

REMOVE REAR COVER:

- 1. Place your hand through the sewing area of the machine and push rear cover to the back until it is released. (Drawing
- 2. Lift the back cover upward and remove from the permanent handle of the machine. (Drawing 4)

REAR COVER AS AN EXTENSION TABLE:

Lower the back metal support leg.

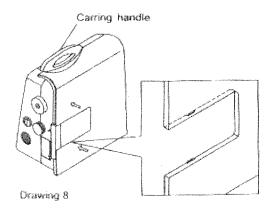

Slide the cover into the slots located on the sides of the free arm. At the end of the slots lift up on the cover and place cover on the latch. (Drawing 5)

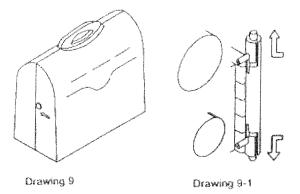

REPLACING THE COVERS ON THE MACHINE:

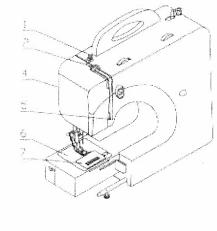

Replacing the rear cover:

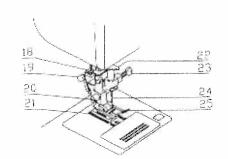

- Push down the spool pin at the back of the machine for storage. (Drawing 6)
- Remove the rear cover from the free arm (used as an extension table) by lifting up and removing from the latch. Slide the rear cover away from the free arm. (Drawing 7)

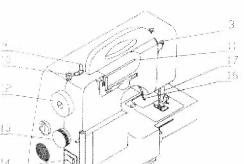

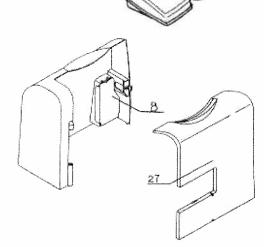

- Place the rear cover over the handle of the machine and snap the cover into place on the back of machine. (Drawing 8)
- Align the front cover at the hinges. Release the top hinge into the cover then release the bottom hinge into the cover. (Drawing 9-1)
- 5. Swing the front cover to the front and close.(Drawing 9)

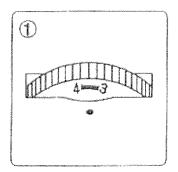

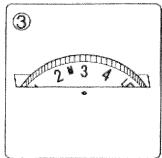

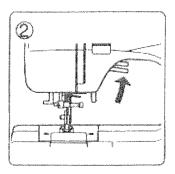

MACHINE IDENTIFICATION

- 32. Speed control

TENSION Decrease or increase the tension of the top

thread by using this control. The higher the number, the tighter the tension.

1. ADJUSTING TOP THREAD

2. PRESSER FOOT LEVER

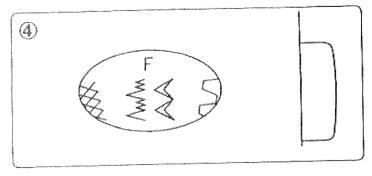

There are three positions for your presser foot.

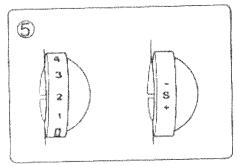

- 1. Lower the presser foot to sew.
- 2. Raise the lever to the middle position to insert or remove fabric.
- 3. Lift it to its highest position to change the presser foot or to remove thick fabric.

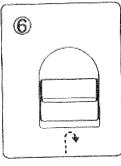

3. STITCH WIDTH / NEEDLE POSITION DIAL

The width of all the stitches produced on this machine can be made narrower or wider by adjusting the stitch width control.

When sewing straight stitching, you can select various needle positions from 0 (right needle position) to 5 (left needle position) with the same control dial. The triangle marking between 2 and 3 shows the center position.

4. STITCH SELECTOR AND INDICATOR

- To select a stitch, be sure needle is out of fabric at its highest position.
- Then turn the selector until the required stitch is indicated on the indicator panel.

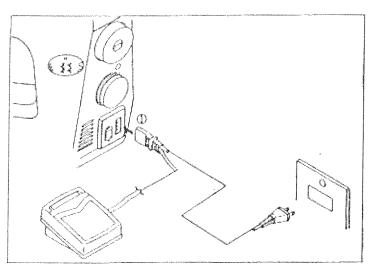

5. STITCH LENGTH / SUPER (STRETCH) STITCH DIAL

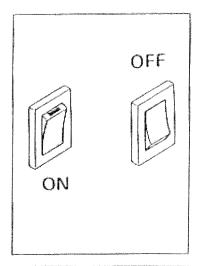

Stitch length can be selected easily according to thickness and type of fabric.

Super (stretch) stitch patterns can be selected by turning the same dial to S mark where fine adjustment can be made.

6. REVERSE STITCH LEVER

It is recommended to begin, or end seams with several stitches in reverse for reinforcement. As long as you are pressing down this lever while sewing, the machine will continue to feed the fabric backwards.

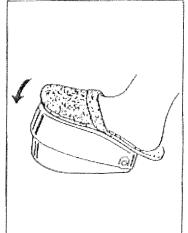

Turning the power switch ON automatically turns on the sewing light.

SETTING UP YOUR WHITE SEWING MACHINE ELECTRICAL CONNECTION

- 1.Connect the foot control to the machine by inserting the 3-hole plug into the socket located on the right side of the sewing machine.
- 2.Plug the power cord into a wall outlet.
- 3 Turn the power on/off switch on the right side of the machine to the on position

POLARIZED PLUG INFORMATION

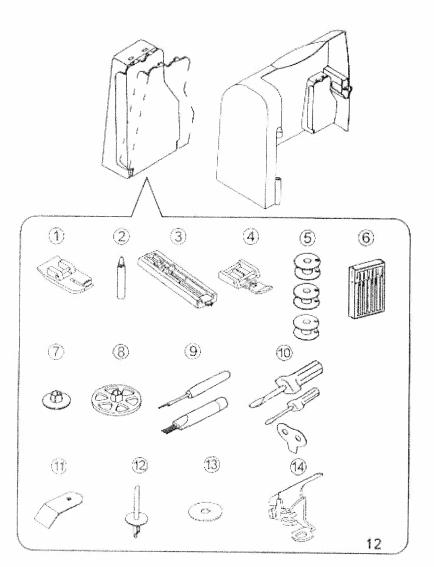

This machine has a polarized plug (one blade is wider than the other). To reduce the risk of electric shock, this plug is intended to fit in a polarized outlet only one way. If the plug does not fit fully into the outlet, reverse the plug. If it still does not fit, contact a qualified electrician to install the proper outlet. Do not modify the plug in any way.

The sewing speed is regulated by how much the foot control is pushed down.

CAUTION:

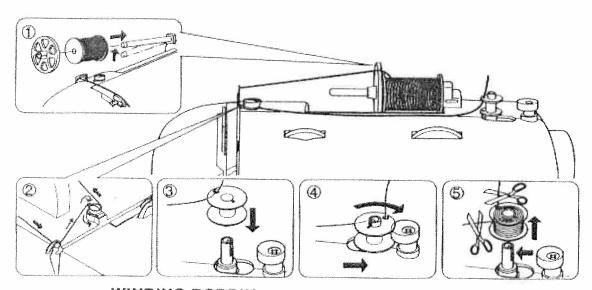

When the machine is not in use or when cleaning the machine, unplug the main power cord from the wall outlet.

ACCESSORIES

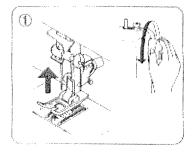

Open the accessory box and you will find a variety of accessories inside. They are listed below.

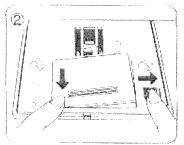

- 1. Straight stitch or piecing foot
- 2. Oil
- 3. Buttonhole foot
- 4. Zipper foot
- 5. Bobbins
- 6. Needles(#14x3pcs & Twin needlesx1 pc)
- 7. Spool pin cap (small)
- 8. Spool pin cap (large)
- 9. Buttonhole opener with brush
- 10. Screwdrivers,3
- 11. Spool pin base
- 12. Spool pin
- 13. Spool pin felt
- 14. Stipling/Darning foot

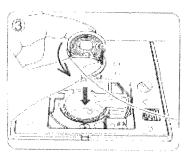

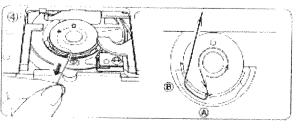

WINDING BOBBIN

- 1. Pivot spool pin into highest horizontal spool pin position.
- Pass a spool of thread on the spool pin. Secure to place a spool of thread on the pin. Secure it with the spool cap to ensure smooth flow of thread.
- 3. Pass thread from spool through thread guides as shown.
- 4. Pull end of thread through hole in bobbin as shown.
- Make sure the bobbin winder shaft is in left position. Place bobbin onto shaft with end of thread coming from top of bobbin. Push bobbin winder shaft to right until it clicks. Hold onto end of thread.
- Start machine. The thread that is held will snap or may be trimmed with a scissors. Bobbin will cease turning when completely filled. Push shaft to left to remove bobbin.

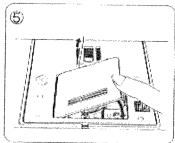

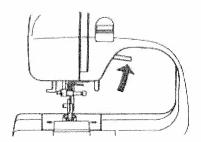

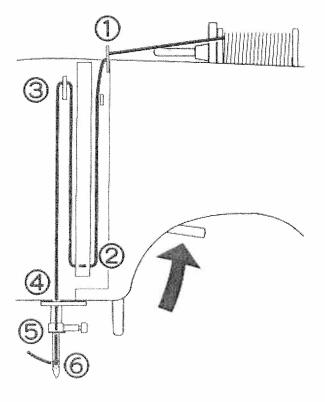

INSERTING THE BOBBIN

Raise the presser foot.

- Raise the needle to its highest position by rotating the handwheel towards you.
- Remove the bobbin cover plate by pressing down on the lower left corner of the bobbin cover plate while pressing the latch to the right that holds the bobbin cover in place. (See fig. 2)
- Insert the bobbin making sure the bobbin rotates counter clockwise with the thread off the top of bobbin to the left.
- Pull thread through the slot "A" and then to the left. Leave about 6 inches (15cm) of thread.
- 5. Replace the bobbin cover plate onto the needle plate.

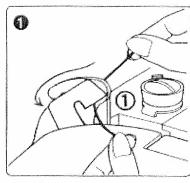

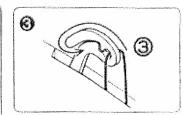

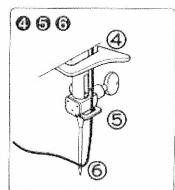

THREADING THE TOP THREAD

- 1. Raise the presser foot lever.
- 2. Raise the needle to its highest position by rotating the hand wheel towards you.
- 3. Thread the machine in the order as illustrated.

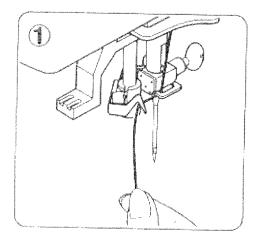

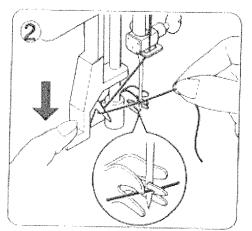

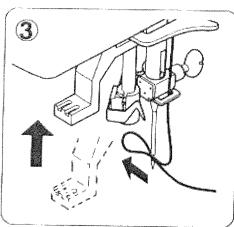

15

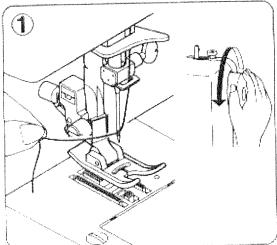

USING AUTOMATIC NEEDLE THREADER

Raise the needle to its highest position by rotating the hand wheel towards you.

- Pull down lever and hook thread to thread guide as illustrated. Continue to push lever until the hooked end passes through the needle eye.
- Guide thread into hooked end and pull it upward.
- Release the lever and needle will be threaded automatically.

Pull loop of thread to back of machine.

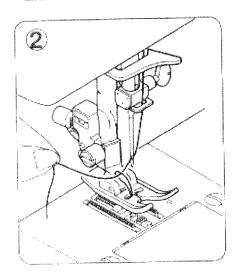

NOTE: For smooth threading it is recommended to set the machine at straight stitching (middle position) when using needle threader.

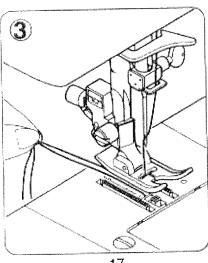

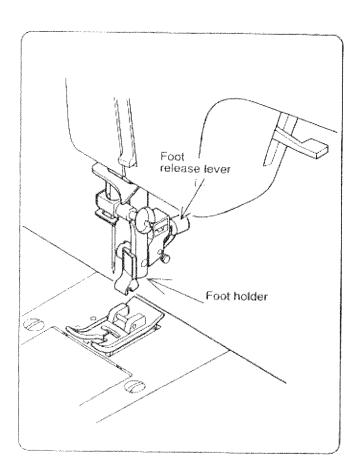

PICKING UP BOBBIN THREAD

- 1. Raise the presser foot lever. Holding needle thread loosely with your left hand, turn hand wheel towards you one revolution with your right hand until the needle comes to its highest position.
- 2. Lightly pull up on the needle thread. This will pull a loop of bobbin thread through the needle plate slot.
- 3. Pull both top and bobbin threads together towards back of machine under the presser foot, leaving about 6 inch thread tail (15cm).

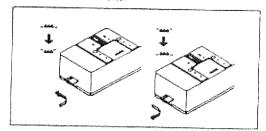

CHANGING PRESSER FEET

- 1. Make sure the needle is in the highest position.
- Raise the presser foot lever. Press foot release lever to remove foot.
- Place presser foot below presser foot holder so that the presser foot pin is aligned with the slit in the presser foot holder.
- Lower the presser foot so that the presser foot holder snaps onto the foot.

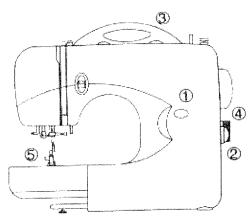

FEED TEETH LEVER

The feed teeth move the fabric under the presser foot as it is sewn. The feed teeth should be up for all general sewing Lower the feed teeth for free motion darning, embroidery, monogramming and stipple quilting When the feed teeth are lowered, you must move the fabric as you sew.

To lower the feed teeth, push the lever in and to the right. To return the feed teeth to the up position, push the lever to the front.

STRAIGHT STITCHES A

Stitch Selector A Stitch Width 3 Stitch Length 1-4

Straight stitch is most frequently used for every aspect of sewing. Learn the correct method of your machine following the steps below.

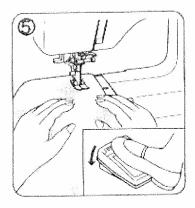

1. SETTINGS

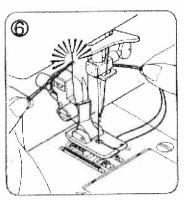

Stitch indicator - A | Stitch length - 2 - 3 Stitch width- (2-3) Thread tension - 3

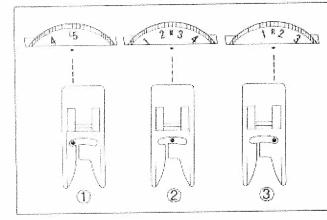

Raise the take-up lever to its highest position by turning the hand wheel toward you.

- A Take-up lever
- (B) Tension dial
- Stitch width/needle position dial
- (D) Stitch indicator
- Stitch selector
- (E) Hand wheel
- (i) Stitch length dial
- Power/light switch
- (Î) Reverse stitch lever
- (I) Presser foot lever

- Pull both threads under the presser foot toward the back of the machine.
- Place the fabric under the presser foot and lower the presser foot lever.
- Turn the hand wheel toward you until the needle enters the fabric.

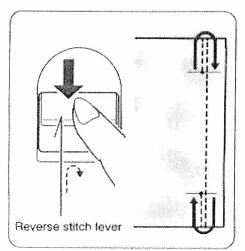

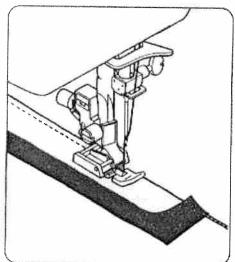

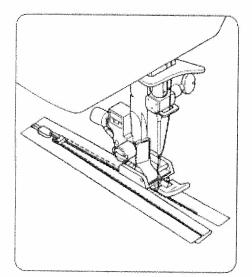

Needle position for straight stitching

- Straight stitch at left needle position with needle position control at L.
- ② Straight stitch at middle needle position with needle position control set at M.
- 3 Straight stitch at right needle position with needle position control at R.

- a. Start to sew stepping on the foot control.
 - b. Guide the fabric gently with your hand.
 - c. When you reach the end of the fabric, stop the machine by releasing the foot control.
- a. Turn the hand wheel to raise the needle.
 - b. Raise the presser foot by pushing the lever up.
 - Use the thread cutter above the presser foot to cut off excess threads
 - d. Pull both threads under and to the back of the presser foot, leaving 4 inches (10 cm) thread tail.

SECURING SEAMS

Secure your seams by taking the first few stitches in reverse. Then allow the machine to go forward. This is called back tacking. Reverse the machine at the end of your seams as well.

Lower the reverse lever for back tacking.

INSERTING ZIPPERS

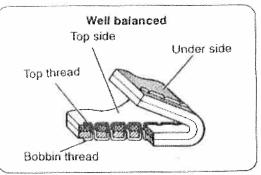

To sew down the right side, attach left side of zipper foot to presser foot holder so that the needle passes through the opening on the left side of the foot.

To sew down the left side, attach right side of foot to foot holder.

PIPING

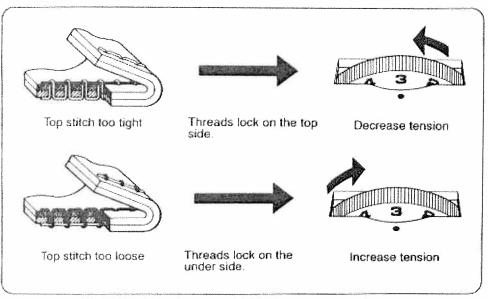

To pipe soft furnishings, cover cord with a bias strip of fabric and pin or tack it to the main piece of fabric.

Attach right side of zipper foot to foot holder so that needle passes through the opening on the right side of the foot.

ADJUSTING STRAIGHT STITCH THREAD TENSION

The good looking appearance of your stitching is largely determined by the balanced tension of both top and bobbin threads. The tension is well balanced when these two threads 'lock' in the middle of layers of fabric you are sewing.

NEEDLE, THREAD AND FABRIC CHART

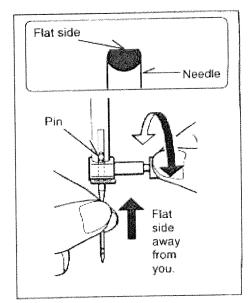

Your fabric will determine the choice of a needle and thread. The following table is a practical guide to needle and thread selection. Always refer to it before a new sewing project. And be sure to use the same size and type of thread in the bobbin as in the top thread supply.

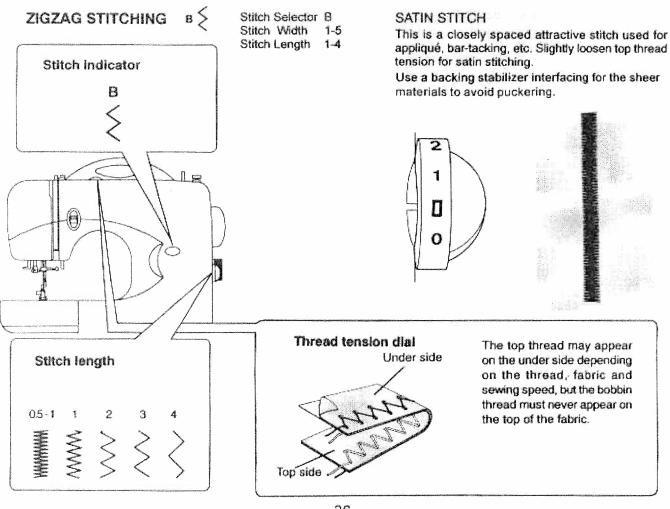

F/	SBRICS	THREAD	NEEDLES	
fiber: cotto	s below can be of a on, linen, silk, wook rayon, blends. The as examples of we	: :Y	market by a financial constraint and the second sec	SIZE
Light- Weight	Batiste Chiffon Crepe	Cotton-wrapped Polyester 100% Polyester * Mercerized Size 60		12/80
Medium- Weight	Corduroy Flannel Gaberdine Ginghem Linen Muslin Wool Crepe	Cotton-wrapped Polyester 100% Polyester * Mercerized Size 50 Nylan		14/90
Weight Heavy	Bonded Wovens Canvas Coating Denim Duck Sailcloth	Cotton-wrapped Polyester 100% Polyester * Mercerized Size 40 * 'Heavy Duty''		16/100
Knits	Bonded Knits Double Knit Jersey Tricot	Cotton-wrapped Polyester Polyester Nylon		Ball point 80 + 14/90

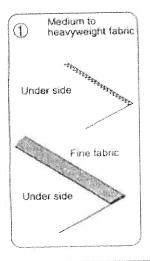

^{*} Do not use on stretch fabrics.

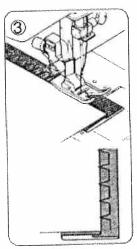

Changing the needle

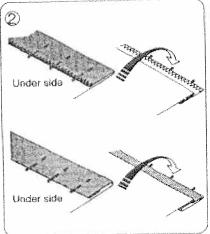

- Raise the needle bar to its highest position by turning the hand wheel toward you.
- Loosen the needle clamp screw by turning it toward you.
- Remove the needle by pulling it downward.
- Insert the new needle into the needle clamp with the <u>flat side away from you.</u>
- 5. Push the needle up as far as it can go.
- Tighten the needle clamp screw firmly with the screw driver.

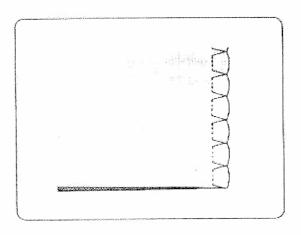

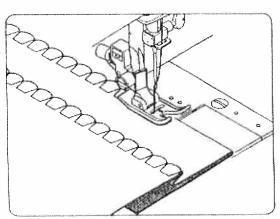

BLIND STITCH C 5 F \$

Stitch Selector C,F Stitch Width 1-5 Stitch Length 1-4

- First finish the raw edge. Do this by turning it under on fine fabrics and overcasting it on medium to heavyweight ones.
 - Then turn the hem up the required depth, press and pin in place.
- 2. Now fold the fabric as illustrated.
- c ≶ Regular blind stitch for woven fabrics
- F 🔰 Elastic blind stitch for soft, stretchable fabrics
- Place the fabric under the foot with the fold of the fabric positioned so that the needle just pierces the fold when the needle swings to the left. Use stitch width control to fine tune exact position of needle.
- When completed, the stitching is almost invisible on the right side of the fabric.

SHELL STITCH D >

Stitch Selector D Stitch Width 1-5 Stitch Length 1-4

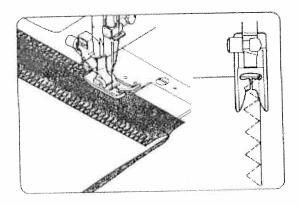

Shell stitch is for seaming and overcasting sheer, soft fabrics in one operation. It also produces a delicate shell hem on lingerie and other fine garments.

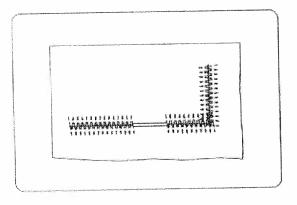

SEAM AND OVERCAST IN ONE

Place the right sides of the fabric together and position under the presser foot so that the zig-zag part of the stitch sews just over the raw edge.

SHELL TUCKS

Turn under the raw edge and press. Place the fabric right side up so that the zigzag part of the stitch sews just over the folded edge, pulling the fabric in to form a shell hem. Trim away excess fabric close to the stitching line.

3-STEP ZIGZAG

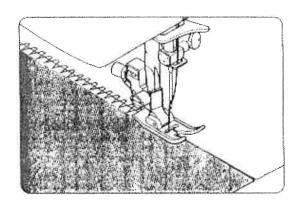

Stitch Selector E Stitch Width 1-5 Stitch Length 1-4

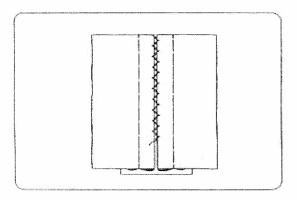

This is a strong stitch because as its name implies, it makes three short stitches where the normal zigzag makes only one.

For this reason it is highly recommended for overcasting all types of fabrics.

It is also ideal for mending tears, patching, sewing towelling, patchwork and attaching flat elastic.

At 0 stitch length the 3-step Zigzag makes an excellent bartack.

DOUBLE-ACTION STITCH & 5

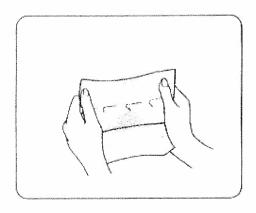

Stitch Selector G Stitch Width 1-5 Stitch Length 1-4

Double-action stitch is ideal for producing flat overlapped seams on almost any type of fabric A bolder effect will result from sewing with contrasting thread.

BRIDGING STITCH 5 H

Stitch Selector H Stitch Width 1-5 Stitch Length 1-4

This is a popular decorative stitch (used in sleeves or fronts of blouses and dresses). To attach two separate pieces of fabric together, leave a little space in between. To prepare the fabric: Fold under the seam allowances on the cut edges, and press. Baste folded edges to stabilizer with about 1/8 inch (0.3 cm) space between. Stitch over the 1/8 inch (0.3 cm) allowance, just catching the fabric fold on both sides with needle. Remove bastings and stadilizer then press.

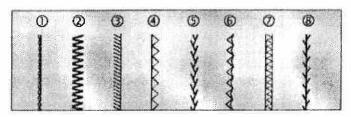

TRIPLE STRAIGHT STITCH A

Stitch Selector A Stitch Width 3 Stitch Length -S+

Triple straight stitch is far stronger than ordinary straight stitch because it locks three times - forwards, backwards and forwards.

It is particularly suitable for reinforcing the seams of sportswear in stretch and nonstretch fabrics, and for curved seams which take a lot of strain.

Use this stitch also to top-stitch around lapels, collars and cuffs to give a professional finish to your garments.

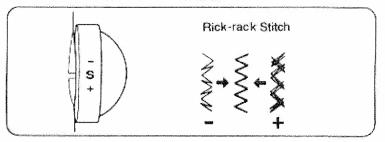

- ①TRIPLE STRAIGHT ②RICK-RACK
- TRETCH OVERLOCK

 OVERLOCK
- SHONEYCOMB
 SELASTIC OVERLOCK
 DOUBLE OVERLOCK
 FEATHER

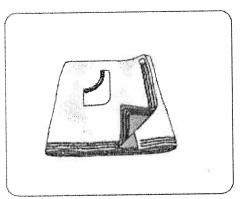

STRETCH STITCHES

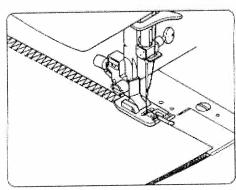

Stretch stitches are mainly for use on knit, or stretch fabrics, but can also be sewn on woven fabrics.

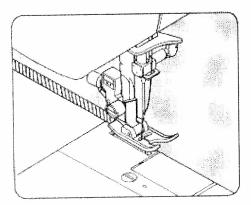

ADJUSTING STRETCH STITCH BALANCE

Stitch length / super (stretch) stitch dial should be at S mark for most materials. Depending upon the type of fabric used, you may need to adjust this dial to match forward stitches of stretch sewing with reverse motion stitches. If the stitches are too open, turn the dial to + position; if the stitches overlap, turn the dial to - position.

RICK-RACK STITCH

Stitch Selector B Stitch Width 1-5 Stitch Length -S+

Rick-rack is a quick method of finishing a raw edge and providing a decorative top-stitch in one operation. It is ideal for edging neckbands, armholes, sleeves and hems.

OVERLOCK STITCH D

Stitch Selector D Stitch Width 1-5 Stitch Length -S+

Stretch overlock seams and overcasts in one to produce a narrow, supple seam, particularly suited to swimwear, sportswear, T-shirts, babywear in stretch nylon, stretch towelling, jersey and cotton jersey.

STRETCH OVERLOCK STITCH C

Stitch Selector C Stitch Width 1-5 Stitch Length -S+

This is the same type stitch used by the garment industry in making sportswear – it forms and finishes the seam in one operation.

It's very effective for use in repairing raw or worn edges of older garments.

DOUBLE OVERLOCK STITCH &

Stitch Selector G Stitch Width 1-5 Stitch Length -S+

Double overlock has a number of uses. It is perfect for attaching flat elastic when making or repairing lingerie. It is ideal for overcasting a single layer of fabric or seaming and overcasting in one step on slightly stretch fabric and non-stretch fabrics such as linen, tweed and medium to heavy-weight cotton. It may also be used for couching over narrow ribbon or yarn or for drawn thread work.

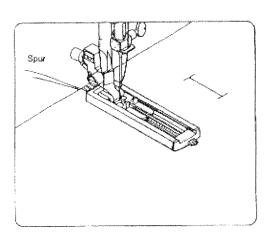

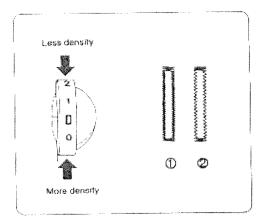

FEATHER STITCH H ₹

Stitch Selector H Stitch Width 1-5 Stitch Length -S+

This beautiful stitch is used for joining fabric, decorative crazy patch quilting and embellishment.

BUTTONHOLES

Carefully mark the buttonhole length on your garment. Place the fabric with the buttonhole marked under the buttonhole foot. Slide the foot forward so that the needle pierces the fabric at the beginning of the buttonhole.

ADJUSTING STITCH LENGTH (DENSITY) AND WIDTH

You can also change stitch density to your preference, within the buttonhole zone marked on stitch length dial.

Narrow buttonholes may be sewn by adjusting the stitch width dial.

Quilting:

Piecing:

The first step in making a quilt is to piece the quilt top.

Attach the 1/4" piecing foot. Guide the edge of the pieces, even with the edge of the foot.

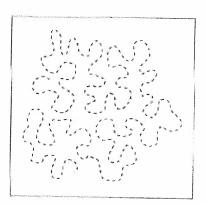

After the quilt is completely assembled, you are ready to machine quilt it.

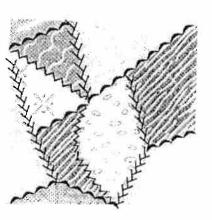

Free Motion Quilting
Cover the feed dogs with the feed cover plate.
Attach the Stippling/Darning Foot
Thread with sewing thread top and bobbin
Select Straight Stitch. The stitch length doesn't matter.

Place a hand on the fabric on both sides of the needle bar and move the fabric as you sew. Practice on a scrap, until you feel comfortable moving the fabric around. You are controlling the stitch length, by the way you move the fabric. You may need to adjust the tension. Usually, you need tho make it tighter, by putting it at a higher number. That will depend on the fabric, batting and threads that you are using. A traditional quilting method is called stippling. You move the fabric randomly, in curvy motion, creating the pattern shown. Technically, you don't want to cross over a line.

Crazy Patch Quilting

Crazy Patch quilting is done by sewing together irregular shapes, and then stitching over the seams with decorative stitches. Piece the shapes, then attach the All Purpose Foot. Thread with decorative thread on top and sewing thread in the bobbin. Place tear away stabilizer under the quilt top, and stitch your favorite decorative stitches over the seams.

Quilting:

Piecing:

The first step in making a quilt is to piece the quilt top.

Attach the 1/4" piecing foot. Guide the edge of the pieces, even with the edge of the foot.

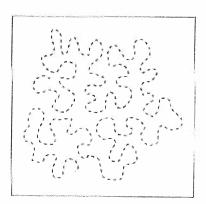

After the quilt is completely assembled, you are ready to machine quilt it.

Thread with decorative thread on top and sewing thread in the bobbin. Place tear away stabilizer under the quilt top, and stitch your favorite decorative stitches over the seams.

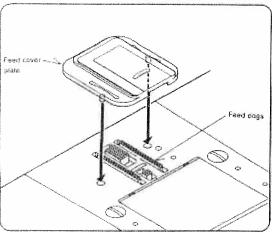

PROCEDURE

	PROCEDURE				
		Stitch forward to the end of buttonhole mark. Stop sewing at the left stitch and raise needle.			
2 2-4		Bartack 4 or 5 stitches. Stop sewing at the left stitch and raise needle to its highest position.			
3 1 3 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1		Stitch backword to the start of buttonhole mark to complete buttonhole.			
2-4		Bartack 4 or 5 stitches. Stop sewing at the right stitch and raise needle.			

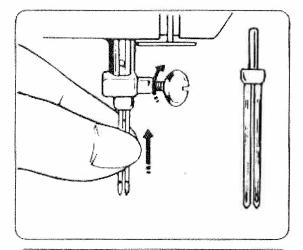

CORDED BUTTONHOLES

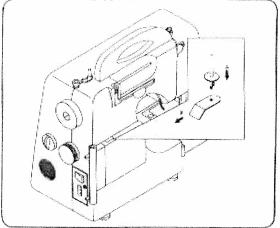

Hook filler cord (crochet thread or buttonhole twist) to the spur and pull both ends of the cord forward under the foot. Sew buttonhole so that zigzag stitches cover the cord.

When completed, release the cord from foot, pull ends of cord forward and snip off extra length.

FEED COVER PLATE

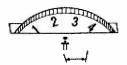

Use the Feed cover plate.
When you need to cover the feed dog.
This is helpful when you what to do Darning, Mending, sew on Buttons, Monogramming, and Stippling.

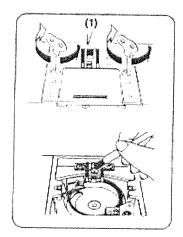

TWIN NEEDLE

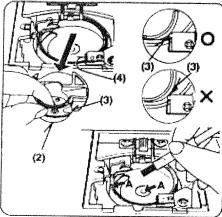

A twin needle is endosed for twin needle sewing and pin tucks IMPORTANT, stitch width setting Must be set at stitch width 3-4.

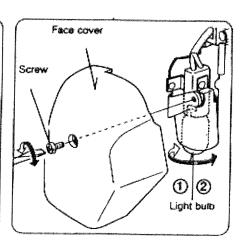

SPOOL PINS

The second spool pin & spool pin base for twin needle sewing. Set the spool pin base into the oblong hole (back of sewing machine) & stick the spool pin into the hole of spool pin base. Place a felt between spool pin with spool of thread.

CARING FOR YOUR MACHINE

To ensure the best possible operation of your machine, it is necessary to keep the essential parts clean at all times. Always disconnect the machine from power supply by removing the plug from the socket-outlet.

Cleaning the feed dogs and hook area

- Raise the needle to its highest position.
- 2. Remove the needle plate (1).
- 3. Remove the bobbin case (2).
- Clean the feed dogs and hook area with the lint brush.

NOTE: Put a drop of sewing machine oil on the hook race as indicated by the arrows A.

 Replace the bobbin case with the projection
 positioned against the spring (4). Replace the needle plate.

Changing light bulb

- Remove the face cover. Push up the bulb slightly and turn clockwise.
- Insert new bulb, push up and turn counterclockwise. Replace the face cover.

Disconnect the machine from power supply before changing a bulb. Do not use a bulb of more than 15 watts.
